B. Tech (CSE)	2022-2025	Institute of Technology, Nirma University	79.60 %
XII | GHSEB	2021-2022	Sabari Vidyalaya, Vadodara	74.77 %
X | GHSEB	2018-2019	Sabari Vidyalaya, Vadodara	88.67 %

INTERNSHIPS

AMI LIFE SCIENCE **Apr 2026 – Jun 2026**

Finance & Strategy Intern	• Built Valuation engine, a Python pipeline automating acquisition-target screening for pharma companies, replacing a manual, multi-day valuation process • Integrated 4 sources (SEC EDGAR & NSE XBRL, annual reports via BM25+Gemini, Yahoo Finance) to auto-populate 301 financial fields per company with confidence scoring • Achieved 100% field coverage across 3 test companies, cutting processing time from 3-5 days to under 2 minutes; delivered version 16 with full documentation

Kodacy **Jul 2025 - Aug 2025**

AI Developer Intern	• Developed and implemented machine learning models for real-world datasets, improving the ability of a predictive model, and obtained real-life experience from this virtual internship • Used AI algorithms and tools (i.e. Python, pandas, scikit-learn, and TensorFlow) to solve real- life problems, and improved skills in model optimization, feature engineering, and understanding results

ACADEMIC PROJECTS

Federated Learning for Genomic Insights	• A Framework that Preserves Privacy – A cooperative machine learning method that facilitates genomic studies while safeguarding sensitive patient information, maintaining both privacy and security
ToxiGraph: A GNN Framework for Predicting Drug Toxicity	• A system utilizing graph neural networks to represent molecular structures for precise prediction of possible drug toxicities
Jarvis – AI Voice Assistant for macOS	• A voice-controlled assistant that enhances system functions, internet searches, media control, messaging, and device oversight on macOS
YouTube Channel Administration Automation Tool	• A system that improves video uploads, scheduling, analytics, and audience engagement for efficient management of YouTube channels

EXTRA - CURRICULAR ACHIEVMENTS

NASA Space App Challenge	• Created AI model to detect and classify exoplanets using NASA's exoplanet data
MINeD Hackathon	• Created AI model which generates multimodal output like PPT, voice summary from research papers as input during hackathon
